EDUCATION

University of Illinois at Chicago – MSc. Business Analytics

Aug 2021 - Dec 2022

Lahore University of Management Sciences – BSc. Economics

Aug 2017 - Jul 2021

TECHNICAL SKILLS

Databases: MySQL, SQL Server, PostgreSQL, Google Big Query, AWS Athena, AWS Redshift, MS Access, ETL/ELT

Programming: Python (NumPy, Pandas, Matplotlib, Seaborn, Scikit learn), R-Studio (mlogit, ggplot2, dplyr)

Tools: VLOOKUP, Pivot Tables, PowerPoint, SAP C4C. SSRS, SSMS, Google Analytics, Salesforce, Alteryx, A/B Testing

Data Visualization: Power BI, Tableau (Prep), AWS Quick Sight, SSRS, Data Modeling, D&B Optimizer, Customer Insights

AI & Automation: Generative AI, Large Language Models (LLMs), Claude Code, AI-Assisted Development, Zapier

WORK EXPERIENCE

Freelancer Projects – AI Engineering *Karachi, PK*

Mar 2026 – Present

- **Built** end-to-end ML [web app](#) predicting Bengaluru property prices ($R^2=0.85$) across **240 locations**; built *Flask REST API*, 6 analytical features, and CI/CD deployment pipeline on Render
- **Deployed** a full-stack [personal finance](#) app end-to-end — delivering **11 production-ready features** by architecting a Node.js/Express *REST API*, *SQLite schema*, and mobile-responsive vanilla JS frontend, with a live public demo

Pregis – Business Analyst, Revenue operations *Chicago, IL*

Jan 2025 – Oct 2025

- **Architected** Executive level **Tableau dashboard** using **LODs and blended sources**, enabling **17% engagement growth** through custom KPIs, 11mo benchmarks, and weekly trends that *drove training, adoption, and resource strategy*
- Collaborated with cross-functional teams to define data requirements using Tableau Prep to automate cleanup and enrichment, accelerating reporting cycles by 40% and improving data reliability for executives
- **Delivered** a Tableau Lead Funnel Analysis dashboard with 75+ KPIs, enabling sales to track conversions, sales cycles, and revenue trends causing **7.1% QoQ** lead growth through strategic outreach insights

Stericycle – Marketing Operations Data Analyst, Chicago, IL

Apr 2024 – Jan 2025

- **Optimized** database performance through advanced indexing strategies and query optimization, *reducing response times* by 30% and enhancing user experience across enterprise systems
- **Engineered** *outbound campaigns* and *ETL workflows* with *SQL*, *Alteryx*, and *Salesforce*, distributing lead assignments across 6 teams, resulting in \$2.3M additional revenue through improved conversion rates
- **Developed** tailored Salesforce reports for *inbound sales* and *product teams*, streamlining monthly communication processes and increasing targeted outreach efforts

The Henry Ford – Business Intelligence Analyst, Dearborn, MI

Jan 2023 – Aug 2023

- **Streamlined** data cleaning using *Azure Synapse*, enhancing data quality by removing junk, duplicates, anomalies, and handling missing data. *Reduced data cleaning time* by **12 hours**, saving ~ \$10,000 monthly in Geocoding
- **Designed** and implemented fuzzy matching algorithm improving data accuracy by 40% across 500K+ records, preventing \$20K in potential compliance penalties
- **Integrated** and transformed data into *Power BI* leveraging *Power Query* and *DAX* functions producing 10+ real-time *KPI reports*, decreasing *operational costs* by 20%.
- **Delivered** actionable data insights to C-suite executives, driving a 15% increase in adoption of strategic recommendations, optimizing processes, and targeted marketing campaigns

ACADEMIC PROJECTS

[Chicago Cancer Center](#) | *Dashboarding, Performance Evaluation, Resource Planning*

- Led cross-functional analyzing 8K+ patients, 48K visits, and \$14.5M revenue. Assessed provider performance, staffing changes, and payer mix, driving data-informed decisions on patient retention, clinic consolidation, and operational efficiency to improve financial outcomes and care delivery

[Estimating Health Care Insurance Expenses](#) | *Scikit Learn, Seaborn, NumPy*

- Conducted exploratory data analysis (EDA) and feature engineering to identify key cost-influencing factors, enhancing model accuracy by 18% through categorical and one-hot encoding. Applied statistical methods to interpret data trends and optimized the Random Forest model by minimizing Root Mean Squared Error (RMSE) via cross-validation and hyperparameter tuning

Certifications

[Alteryx Machine Learning Fundamentals](#) (Aug 2024 – Aug 2026)

[Alteryx Designer Core](#) (Oct 2024 – Oct 2026)
